tesfadaniel1@gmail.com

(204) 223-2990

I am a front-end developer experienced in building applications with a keen interest in a clean and modern user interface. With a self-starter attitude, I am highly motivated and proactively looking for new techniques & challenges to expand my knowledge base. I enjoy collaborating with people and also thrive operating independently.

Skills & Tools

HTML	React	Wordpress
JavaScript	React Native	Figma
SCSS	Ionic	Adobe XD

Projects

Stoic Widgets
iOS Widget App

iOS 14 widget app built using React Native and Swift. Stoic Widget provides a daily dose of insightful quotes to help users practice and embody stoic virtues throughout their day.

Winnipeg Transit Live
iOS & Android App

A real-time transit app built using React and Ionic. The app consumes Winnipeg Transits API data on stops and routes and presents it in a beautifully designed user interface.

Linkup
Web app

A web application that enables users to distribute their online content and profiles from a single page. It's similar to Linktree, except it's free.

Relevant Experience

Website Developer
Gwen Secter I Student Job

Summer 2020

I modernized the center's online presence by redesigning and executing their website packed with features such as email newsletters and online payments in a modern & user-friendly development platform.

Graphic Designer
Riverwood Church

2019—2020

I created graphic design content for digital and print platforms following the organization branding guide. Collaborated with the creative team to develop a visual identity for monthly teachings and annual events with a set of contents such as posters, invite cards and motion graphic videos.

Education

Red River College
Digital Media Design Diploma

I studied how to design, prototype, and build websites and interactive mobile applications from scratch using Photoshop, Adobe XD, HTML, CSS, JavaScript and PHP.
